## **NO employment conditions agreement for the defence sector in the Netherlands**

**The Netherlands, 04.10.2018**

During the consultation of 04.10.2018, the trade unions of the government staff indicated that they could not agree with the negotiation result.

All four trade unions were unanimous, so there is no collective bargaining agreement for the defence sector!

The members decided with 74% that they spot nothing new, no changes in the proposals. Furthermore they expected an increase in the allowances, but the salary development is insufficient.

There is a worsened pension perspective, which was a serious expectation.

The staff deserves respect and appreciation. If that does not happen, it does not look good for the defence sector, given the negative atmosphere and the extremely large and unscheduled outflow of personnel.
